LEED Green Associate V4 Exam Practice Tests & Summary Sheets (LEED Green Associate Exam Preparation Guide Series)

Synopsis

TEST AND REINFORCE YOUR KNOWLEDGE WHILE IDENTIFYING THE WEAK SPOTS! The LEED Green Associate V4 Exam Practice Tests & Summary Sheets are designed to provide the reader with a real exam simulation presented through 2 full-length Practice Exams and Summary Sheets in order to test and reinforce knowledge while simultaneously identifying weak points. The exams have been prepared in the same scope and format as the actual LEED Green Associate V4 exam, and the questions were based on the most important concepts to capture all the critical information that will be encountered during the actual exam. In addition to the Practice Exams, the book contains Summary Sheets to point out the most important strategies of each credit category, as well as the programs, standards, and definitions that will make up the critical section of the actual exam. The Summary Sheets are designed to fill in any missing knowledge and make a big impact on the reader's exam score in a little time. The book is strongly recommended for any test taker who needs to reinforce their knowledge, complete practice tests, and become familiar with the actual exam scope and format. Test and reinforce your knowledge, while also identifying weak spots. Learn the most important information that you need for the exam. Fill in the missing knowledge with the Summary Sheets. Familiarize yourself with the actual exam scope and format.

Customer Reviews

A. Togay Koralturk is an expert on green buildings and sustainability, and is the author of the LEED

Complete Study Guide series, which is widely adopted as the primary course material for bachelor's and master's degree classes in architecture and civil engineering in universities throughout the United States. Holding a bachelor's degree in civil engineering and a master's degree in construction management from the University of Southern California, he began his career in Los Angeles, California, in project management, earning his LEED AP credential along the way in 2008. He has played a major role in directing numerous projects pursuing LEED certification worldwide and in educating professionals about green buildings and sustainability. His works on green buildings and LEED have sold thousands of copies worldwide, and their sales continue to grow.

This and "NEW LEED v4 GREEN ASSOCIATE GUARANTEED" by Adam Ding were the two best study guides I used for the LEED Green Associate exam. I have an arsenal of certifications and this certification exam is the easiest test I have ever taken. I scored a 190 out of a possible 200 and I have zero (0) experience in construction, I'm an IT guy. This book alone would have probably been enough to pass the exam and coupled with the Adam Ding book would make this cert a piece of cake!!!!

Provides brief summaries of the important parts of each section which is useful. Practice exams provide good explanations for the answers. The greatest flaw is the terrible grammar throughout. Seems like there was little to no proofreading done. Other study guides I've used haven't had this problem.

this is was a pretty helpful text. after reading most of the required material, I honed in my studying with this book. I wish it had more than 200 questions, but it worked. the Appendices in the back helped provide concise information about what should be remembered. I would say overall this was a helpful text to pass your exam... since i did pass! Hooray!

Passed the test because of this book. An excellent study guide.

Very good set of questions and answers that give good insight on what to expect during the exam.

Well prepared practice tests. Highly recommend it. And if get a little low on the practice tests, study the summary sheets well, they're very helpful.

GOOD BOOK TO HAVE

Well, I passed the test with it. What else could I ask for?
