Chemistry And The Enlightenment

Synopsis

In the seventeenth and eighteenth centuries, scientists went beyond Aristotle's four elements (Earth, Wind, Fire, and Water) to catalog nature's many basic elements. New materials and potions stimulated visions of wealth and healing; soon, new theories of atomic structure and combustion laid the foundation for practical applications that blossomed into the Industrial Revolution. The Science and Discovery Series recreates one of history's most successful journeys--four thousand years of scientific efforts to better understand and control the physical world. Science has often challenged and upset conventional wisdom or accepted practices; this is a story of vested interests and independent thinkers, experiments and theories, change and progress. Aristotle, Copernicus, Kepler, Galileo, Newton, Darwin, Einstein, and many others are featured. --This text refers to an out of print or unavailable edition of this title.

Book Information

Audible Audio Edition

Listening Length: 2 hours and 42 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Blackstone Audio, Inc.

Audible.com Release Date: August 3, 2006

Language: English

ASIN: B000HD7K3K

Best Sellers Rank: #34 in Books > Audible Audiobooks > Science > Chemistry #2963 in Books > Science & Math > Chemistry > General & Reference #5384 in Books > Science & Math > History & Philosophy

Customer Reviews

I loved these CDs.
