Bloodline Of The Gods: Unravel The Mystery In The Human Blood Type To Reveal The Aliens Among Us

Synopsis

Are significant numbers of humanity the product of an ancient and advanced alien civilization? Have we, across the millennia, been periodically modified and refined as a species? In short, has our genetic make-up been manipulated by otherworldly beings that view human civilization as one big lab experiment? These are controversial and thought-provoking questions. They are also questions that demand answers, answers that may very well be found by examining those people whose blood type is Rh negative. The vast majority of humankind - 85 to 90 percent - is Rh positive, which means a person's red blood cells contain an antigen directly connected to the Rhesus monkey. This antigen is known as the Rh factor. Each and every primate on the planet has this antigen, except for one: the remaining 10 to 15 percent of humans. If the theory of evolution is valid - that each and every one of us is descended from ancient primates - shouldn't we all be Rh positive? Yes, we should. But we're not. The Negatives are unlike the rest of us. They are different. They are the unique individuals whose bloodline may have nothing less than extraterrestrial origins.

Book Information

Audible Audio Edition

Listening Length: 7 hours 38 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Tantor Audio

#229 in Books > Religion & Spirituality > Occult & Paranormal > Ancient & Controversial

Knowledge #701 in Books > Audible Audiobooks > Religion & Spirituality > New Age & Occult

Customer Reviews

Okay Nick Redfern has really gone all out on this one. This book covers a wandering mother lode of information, with the core focused around the negative Rhesus factor of blood. Great discussion on the history of blood typing, a quick review of the history of human kind, and there is constant reference back to certain groups of people whose blood lacks the Rhesus factor. He brings up the possibility that if all the information is true - and he has done his research well - then another form of

persecution could be on the cards. I liked what Nick has done with the information here. Very easy reading, especially if you are an ancient history buff.

I could see where the author was going with things, However there could also be a medical or more scientific reason to RH negative blood. Enjoyed the book and anyone who wishes to consider why the RH factor exists will find it interesting.

This book is only okay because I believe it is a difficult subject to write about. Even the Bible talks about sky beings/Angels having sex with humans, producing offsprings. Bloodline of the gods explores this and the unusual Rh negative blood type. If you haven't thought along the lines of bluebloods existing, you will find this book useful. Redfern does an acceptable job trying to give an overview.

He just repeated Stichin, no new information.

Redfern is one of my favorite alternative researchers for his unique writing style -- which meets the trifecta of clarity, entertainment, and integrity -- and his writing on this vast and complex topic is especially lucid. If you are interested in Annunaki or the Rh negatives, I would highly recommend this book. It may not reveal much if anything new for the seasoned reader, but its clarity alone makes it a worthwhile addition to any alternative researcher's library.

this book is a secular theory on the origins of the RH neg blood factor. it reflects popular view such as the Ancient Astronaut theory which has a lot of holes in it. i like to take in all sides of the debate and decide for myself via critical thinking. in my humble opinion this book was thrown together in a hurry as an effort to get the authors opinion out there. i generally enjoy books by Nick Redfern, this isnt one of them.

10 Stars for this book, it is a great book. Loads of information. Easy to read.

enjoyed the read. not sure I believed the theory.
