Summer Brain Quest: Between Grades 2 & 3

Synopsis

Stop summer slide, stay summer smart! From the creators of America's #1 educational bestseller Brain Quest comes Summer Brain Quest: Between Grades 2 & 3—a workbook, a game, and an outdoor adventure! It's an interactive and personalized quest to keep kids excited about learning all summer long between 2nd and 3rd grades. Summer Brain Quest: Between Grades 2 & 3 begins with a map that guides you through a workbook filled with activities based on adjectives versus adverbs, reading comprehension, writing opinions, word problems, place value, measurement, map skills, and more! As you complete activities, you earn stickers to track your progress on the map. Jam-packed with curriculum-based exercises, bonus challenges, outside activities, over 150 stickers, a summer reading list, and a Brain Quest mini deck, Summer Brain Quest: Between Grades 2 & 3 covers the core concepts in English language arts, math, science, and social studies so kids keep essential skills sharp all summer.

children's products, our wide range of high-quality non-fiction titles and products inspire,
educate, and entertain readers around the globe.

Sky Woman's PowerNative American FolkloreUpon completion, add this sticker to your
path on the map! Many native people call North America Turtle Island. Number each passage of the
story in the correct sequence to learn why. But Sky Woman had a special power. If she
had even a small bit of earth, she could make more earth. Enough for everyone to live on. Sky Woman placed the earth on a turtle's back. Then she used her powers to make more
and more land • until the tiny bit of earth grew into what is now called North America! One by one, each animal dove, but none of them reached the bottom. Finally, only the tiny
muskrat was left. However, there was no earth to be found! So Sky Woman asked all the
animals to dive to the bottom of the ocean and bring some earth back up to the surface. Once, a great flood covered the world. Sky Woman came down to Earth, but there was no place for
her to rest • just miles and miles of water, all over. The muskrat was gone all day
and all night. But in the morning, his furry whiskers broke the surface of the water, and after a deep
breath, he offered his paw filled with a tiny bit of earth!Now add this sticker to your map! BONUS:
How does Sky Woman remake the world?

All I can say is she is doing this book and having fun at it! Buy it. Typically, these type of books just
collect dust and eventually get donated. This one is not only almost complete, we had to get a
replacement for it when the first one went missing and she was actually SAD! It's a great book.

Decent book. I'm not a fan if common core but since that hasn't been changed yet, this books is pretty good. Kind of short tho. About 10 pages per level so I wouldn't have your child do them all at one time. Brain boxes at the bottom of the page to help your child understand things.

Well laid out and perfect transition level from Grade 2 to 3. My granddaughter did struggle with some of the math and half way through the book, she grandchild lost interest. This would be good for the first month of home school as a refresher before the real work begins.

Fairly decent... wish it had 3 digital math, actually more math in general would have been a big improvement. The biggest positive is my daughter liked doing it... loved the stickers and sticker grid. I liked how most of the exercises were doable for independent work.

My child & I have been having a lot of fun working through this book on summer break. Nothing has been too terribly challenging, just a fun way to keep the information from the past school year fresh. I love the Map that tracks the journey through the book and reward stickers for each thing completed.

Great for summer review and to prevent summer slide! There's a good variety of subjects, and the sticker map is fun and motivating too. Every level, bonus question, and outdoor adventure quest completed gets a sticker to add to the pull-out map. I like how each level rotates through different subjects in order to prevent boredom. For example: one page might be language arts, then science, next math, then social studies, etc. The outdoor adventure quests are a nice change of pace too. The pages are high quality as well. I was looking forward to ordering this workbook, and I'm glad I did!

I really like this book. My kid is most of the way through it, and I think it's really helping prepare him for 3rd grade. My only complaint is I think there should be a bit more of the more abstract type of math that 2nd graders do, to keep that fresh. But it does very well with the more straightforward skills.

This is a fun book that is relatively self-guided for my 2nd grader. She loves the 'map' to see her progress and likes all of the different activities.
