Charles Timmerman is the founder of Funster.com, a word game website that was selected as a Yahoo! Pick of the Year, and the author of more than 100 puzzle books, including The Everything Word Search Book, The Everything Giant Book of Word Searches (Volumes 1 to 4), and The Everything Easy Word Search Book.

My 75 year old Grandma just loves word search puzzles. She calls them her "brain exercises". However she has a little difficulty seeing all those little letters as she has gotten older. I bought her The Everything Large-Print Bible Word Search Book and in return she mailed me a \$50 check and told me to buy her every large print word search "the " had. I would say it's a smash hit for her! I think if you're looking for a gift from a grandmother or grandfather you can't go wrong with one of

these books. They're easy to read and provide enough challenge that they'll enjoy doing them.

We bought this for my husband's mother who has Alzheimer's. She has only a few beloved games she likes and remembers how to play. She has been doing word searches recently. Although she may not know what the words mean, she likes to find and match them! Hopefully, any mind strengthening she can do will help slow down the Alzheimer's progression! She loves the Bible version since much of that is still familiar to her.

This is phenomenal! The scripture is printed on the left hand page....the book, and verse(s).. The word search is on the right hand page. The words in the search are in italics throughout the written scripture. Excellent!

I purchased this for my grandmother while she was in the hospital and she absolutely loves it. In the back are Bible verses which is a fun addition to the word search. Great price for a product that will be used and enjoyed for a while!

Great book! I purchased for a Christmas gift and I am very pleased. There are different puzzles with different themes there are scriptures to match those themes. I'm very pleased with the font size as well.

This was a recommended Christmas gift for a friend who has vision issues. I got no feedback but assume it was well-received since her relative recommended it.

I gave this book five stars because it's just what it should be. Unfortunately it was too difficult for my memory impaired relative. She just couldn't remember what she was supposed to do. :( Not the fault of the compilers -- next time I'll try something easier.

My mom has dementia and we find that word searches are one of the best things to hold her attention and keep her feeling positive. She absolutely loves this book and spends hours on it. Highly recommended!!
