Customer Reviews

NATIONAL GEOGRAPHIC is one of the worldÂ¢â –â¢s leading nonfiction publishers, proudly supporting the work of scientists, explorers, photographers, and authors, as well as publishing a diverse list of books that celebrate the world and all that is in it. National Geographic Books creates and distributes print and digital works that inspire, entertain, teach, and give readers access to a world of discovery and possibility on a wide range of nonfiction subjects from animals to travel, cartography to history, fun facts to moving stories. A portion of all National Geographic proceeds is used to fund exploration, conservation, and education through ongoing contributions to the work of the National Geographic Society.

These books are really cool. My 12 year old loves to read these and learn all the weird things in them. She often shares the facts with her siblings. We have both Ultimate Weird but True facts 1 and 2. She was super excited to see there was a 2nd edition of the book. They are full of colorful pictures. Some pages have a lot of facts on them and others are dedicated to one thing. There is a two page image and several facts on a lizard that walks on water. All the facts on these two pages relate to the lizard, how he can run on water, stay under water for 30 minutes, where it lives, and how he can do these things. The book cover a wide range of topics, not just animals, but all types of things. Some of the other topics covered are Extremes, from extreme sports to hot and cold extremes, and extreme exploration. Freaks of Nature which covers weather, water, sensations, insects. There are 9 chapters, each chapter is a different topic and there are many facts for each chapter. Just shy of 200 pages of intriguing facts.

My 8 year old is always telling me random facts about stuff. I saw this book and thought she'd enjoy it to add to her brain collection of random stuff. I wasn't wrong. She loves to flip through it and share the things she finds with anyone who will listen. The short paragraphs and great pictures makes it easy to read or peruse at her leisure.

This book keeps my 8 and 11 year olds occupied for hours learning and reading about bizarre facts! Love that it's a large hardback book as well. Great buy!

This line of books will capture any 2nd-3rd graders interest and also encourages social skills with classmates, teachers, and family.

Fun interesting read. Kids love it

I bought book 1 and book 2 for my boys 8 and 12 and they love it. Anything engaging and educational to get them away from electronics is great. They love sharing the fun facts with family and friends.

Exactly what my 7 year old son loves! Interesting facts, great pictures, easy to read. Perfect. Only downside is that he reads it to us constantly! lol

My 9 year old son and his friends read this while their riding in the car. They seem to really love it. My sons friend told him he wasn't done reading it and wanted to bring it inside with them when we got home from the car ride.
