This is an awesome how to draw book.First, though this book is or the younger crow it is full of wonderful character design examples. It is easy to take these characters as bases and expand upon them.. basically.. great for the child of any age :) My be borrowing this from my daughter often.Second, I love the binding. It is designed to lay flat no matter what page you are on so you don't have to find a paper weight or prop the book open while drawing one of the subjects.Finally, great price for what it has to offer for young and old.

My kinder kids love learning to draw during a whole class guided group lesson. Each drawing take about 5 minutes when making sure all 23 children have added each line, and I go very slowly. Then they can practice on their own another time. :-)

Great deal. Easy to follow

My son has sat besides me to watch me draw and kept asking where could he start. I hunted for something and came across this that I thought would be good for a beginner, which it has been a success! He shares this with his friends at school and helps his younger siblings.

Cant recommend this book enough. I have a first grade Grandson who is very much into drawing and he and I enjoyed the drawing prompts ttogether on Thanksgiving. This book makes art enjoyable for everyone!

What a delightful little book. The spiral binding makes it easy to use as the pages lay flat when open. My granddaughter likes this book very much. Even this "old dog" is learning how to draw.

My 6 yo nephew loved it, and was able to follow directions without any external help. I was shocked at how well he got within just 10 drawings!

Very nice book to teach kids how to draw! My niece and I had fun picking out what we'd like to draw and watching our art come to life!
