However, often it is the case that the body over-uses inflammation and it starts to break down and hurt other functions. It is not just those with arthritis who can benefit from utilizing an anti-inflammatory diet. There are many foods that are in our diets now that are not naturally occurring. They begin in labs rather than in the ground. These foods are not what your body is meant to process. There are foods that automatically prevent your body from focusing on what it needs to in order to keep you happy and healthy. Long before she became a renowned self-development, fitness, and health expert, Dr. Hanna Parkes used to be on the receiving end. She battled eating disorders in her teens and was cyber bullied due to her weight problem. Her negative experiences during her childhood years became her one of her sole motivation to address the problem and seek professional help. On her road to recovery, she dedicated a huge amount of her time and energy learning and educating herself on self-development and staying mentally and physically healthy to build up her self-esteem. At the young age 23, she earned herself a degree in Nutrition Science and worked her way to achieving a Master Degree and Ph.D. in the same field a few years later. At age 36, Dr. Parks now lives with her husband, Dr. Gerard Parkes, a doctorate degree holder in Naturopathic Medicine. The couple has dedicated over a decade of their lives living from one continent to another educating and sharing their expertise with local communities around the world. Some of their campaigns include obesity awareness and improving self image. They have also trained a number of health enthusiasts and have established about a dozen clinics offering alternative medicine in three different continents. She is also actively writing a series of books in her vision to widen her reach and help educate more people across the globe. Dr. Hanna Parkes and her husband are currently back in her hometown of Chicago, where they vow to continue to help individuals who are struggling with eating disorders and weight problems. Starting this year, she intends to set up boot camps in the summer that will train young adolescents on how to take care of themselves better and improve their self image.

I have been suffering from inflammation for quite some time now. I searched the internet for some information about it, until I happened to stumble upon this book. It's such a blessing to have found this, because I have learned a lot of valuable things in regards to the anti inflammatory diet and how it can effectively treat my condition. This has also made me fully understand what inflammation is, as well as its causes and symptoms. And for that, I am truly thankful.

Good recipes

inflammation of the gut is a common disorder of the digestive system given the unhealthy and untimely eating lifestyle in today's busy world.. but this problem can be rectified by lifestyle change and this book has some really amazing recipes and tips on anti inflammation that can really be useful for people suffering from this problem

Good book, a lot of information and great recipes!

Informational

I thought I was going to learn a lot about inflammation and the biochemistry behind the health problems caused by it. Instead, there is only basic information along with everything you already know: drink lots of water, don't eat the standard American diet, and avoid stress. There are only about three recipes and Boom! You're at the end of the book. It took me all of five minutes to read in its entirety. This "book" is written on the level of a high school term paper and not very well edited. Save your money and avoid this one if you really want to learn something!

This is a guide only with some basic information but no follow through. Glad this was free or I would have been upset
