Customer Reviews

Can't believe I just paid for it... No practical information beyond of what you can find in internet. Not even ONE recipe given! I wonder where all of this positive reviews come from...

A booklet with very basic information. Not enough detail to actually make perfume.

This book is barely a book at all. There's little to no information in it. And what is there is very easily found on this internet. Save your money.

I was very disappointed with the book. It did not meet my expectations at all.

Lovely and a very well written book I must say. I really loved the thought of making an organic perfume all by yourself with 24 hrs or even less. I love perfumes and I keep trying lots of them. I have a great collection of them. I found this book very interesting and grabbed it and now I'm just enjoying making it at home. If you really have all the required ingredients then you can start it as this book has all the instructions very clearly and it's very easy to follow as well. Making organic perfume all by yourself will definitely give that self satisfaction and also is very good if you think from health perspective. Highly recommended and a must read book!!!!
