Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and

science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

A truly beautiful map, crisp and easy to read. Covers the area from Front Royal to Charlottesville and since I live near the park I'll be carrying this map in my car for constant reference. Very well done, NG.

Bought this to plan and use on upcoming AT segment hike through the park. Had previously bought NG's Smokey Mountain NP map and it had more detail about the AT that was very helpful in trip planning that is lacking on this map (AT elevation chart w/ campsite mileage). Other than that, this appears to be an excellent map for the overall park. The paper is excellent for trail use as it is water and tear resistant.

Map is nicely constructed and served us well on a 3 day backpacking trip recently. Held up well to spills, perspiration, and being stuffed into a pocket.

This was a gift for a good friend. When he received he loved it as he hikes in Shenandoah with his wife a lot. He loved that it was/is water proof and that it folds and stores easily. The map had clear detailed trails and lined up with his other state forest maps of that area. The shipping timing was perfect as it said it would take 2 weeks, I had it in 4 days just in time to give it to him for a special occasion. Great service and communication.

These maps are a must when you plan to spend some time exploring a National Park. They are heavy duty paper and show the roads and trails and other park features. A great companion to a hiking book.

I bought this map for a trip I had with my roommate. It rained the entire time the map held up and we didn't get lost. For a map I would consider this a win. If you plan to hike the Shenandoah Valley make sure to bring this map with you...it is a must!

Well thought out - plastic coated sort of map - should stand up to some use and weather.. (not plain paper) Planning a backpacking trip - really helps to see the trails we will be on. Also shows the

roads a good distance all around the park...

Trail distances labeled! This is one of the major differences to the Outdoor recreation/Naturalist version of this map!Used this for a 3 day backpacking trip and it was very useful.
