Project MK-Ultra And Mind Control Technology: A Compilation Of Patents And Reports

Synopsis

People around the world claim to be victims of mind control technology. Medical professionals are quick to marginalize these targeted individuals and diagnose them with mental illness. Unfortunately, most people are oblivious to the historical precedent for the practice of mind control and the patented technology that exists in the field. This book includes a compilation of the government's documentation on MK-Ultra, the CIA's mind control experimentation on unwitting human subjects; all documentation on this program was ordered destroyed by CIA Director Richard Helms in 1973, but a cache of records survived and were made public through a Freedom of Information Act request in 1977. It also contains over 150 patents pertaining to a wide variety of subjects: artificial telepathy (voice-to-skull technology), behavior modification through radio frequencies, directed energy weapons, electronic monitoring, implantable nanotechnology, brain wave manipulation, nervous system manipulation, neuroweapons, psychological warfare, satellite terrorism, subliminal messaging, and more. A must-have reference guide for targeted individuals and anyone interested in the subject of mind control technology. The experiments and technology described herein reveal the government's activities in a variety of fields utilizing an assortment of methodologies. Subjects covered include: Drugs; Hypnosis; Subconscious Isolation; Extrasensory Perception; Victims; Mind Control Technology; Artificial Telepathy; Behavior Modification; Nervous System Manipulation; Mind Manipulation; Mental Monitoring; Directed Energy Weapons; Electronic Surveillance; Implants and Nanotech; Subliminal Messaging; and more.

Book Information
