Nice read

Highly recommend this book and Every Child Can Succeed. by Mrs. Tobias if you are fearful that your smart child is faltering in school and after school homework is making everyone stressed. Great for parents and grandparents; public school students and home schooled. Will certainly help in my approach to the grandchildren when they come for a visit but have necessary homework to complete.

My wife asked for this book and she is "eating" it with such passion that got me intrigued! It was recommended by a home schooling mom and nail it! Understanding the way people learn will help those moms worried about their children's future to teach them the way they need! Not the usual "get forced by the regular school system" type of teaching. This is a book to unleash the genius that is within every person...schools are a thing of the past (if they don't update!)

not sure what I expected, this book is fairly short but gives a very general but broad definition of 5 different aspects of personality and learning, with examples, I found it enlightening and will be

loaning this copy to my boss :o) - we disagree on how a person should "sit" at their desk and if you can listen o music and work both of which are examples of legitimate but seemingly conflicting ways to concentrate

Cynthia Tobias has a great amount of excellent help in this book for parents, or teachers, to figure out how children are individuals and learn by different methods. Learning those methods will facilitate even better learning, since our children are never 'one size fits all', just as God intended. Have a problem child? I recommend reading this and finding his/her learning style. You won't be sorry.

My kids learning styles are a mystery to me. So this book is coming in very handy. I've found myself and a couple of my children. But she gives some really great insights into how our personalities work. Also, she gives good information on how to relate to the major learning styles and how they relate to others. I'd definitely recommend this book.

I love this book and I am not a reader at all! This book not only allows you to understand and help your children but also helps you understand people all around you, including yourself and loved ones!! I have read this book straight through and enjoy reading it piece by piece like a study book :) Highly highly recommend this book for EVERYONE!!
