Music And Trance: A Theory Of The Relations Between Music And Possession

Synopsis

Ritual trance has always been closely associated with music – but why, and how? Gilbert Rouget offers an extended analysis of music and trance, concluding that no universal law can explain the relations between music and trance; they vary greatly and depend on the system of meaning of their cultural context. Rouget rigorously examines a worldwide corpus of data from ethnographic literature, but he also draws on the Bible, his own fieldwork in West Africa, and the writings of Plato, Ghazzali, and Rousseau. To organize this immense store of information, he develops a typology of trance based on symbolism and external manifestations. He outlines the fundamental distinctions between trance and ecstasy, shamanism and spirit possession, and communal and emotional trance. Music is analyzed in terms of performers, practices, instruments, and associations with dance. Each kind of trance draws strength from music in different ways at different points in a ritual, Rouget concludes. In possession trance, music induces the adept to identify himself with his deity and allows him to express this identification through dance. Forcefully rejecting pseudo-science and reductionism, Rouget demystifies the so-called theory of the neurophysiological effects of drumming on trance. He concludes that music's physiological and emotional effects are inseparable from patterns of collective representations and behavior, and that music and trance are linked in as many ways as there are cultural structures.

Text: English, French (translation) --This text refers to an out of print or unavailable edition of this

title.

A theory of the relations between music and possession.

I have not quite finished this book, however the authors approach is impeccable and what I have read of it makes sense. I am not sure whether the author delves into music theory itself, however this will be a useful book for anyone interested in the subject and there are lots more recent works on the neurological aspects of music and its effects on consciousness.

great!

Disappointed.

exhaustive experience of reading. It takes care of all the aspects regarding those two topics: music and trance. Samples over all the world's tribes (candomblé), links with sciamanism, tarantism, misterism, mystic ecstasy, obsession and mania, from old greece to modern Brasil, Africa. Againsts: too exaustive, it perhaps lacks of a sinthetic conclusion.
