Customer Reviews

The "book" refers to a superfood that will help cure tinnitus and says to click on a link to find out

what is is. There is no link. The book refers to videos and mp3's on the author's website for instructions, yet there are no links to the website. If the website is down, then fine, but the book should be updated with the information that is referenced to the site, at least with the super food. I see another reviewer has mentioned this, yet the correction has still not been made. The author must not care much about his readers.

I can't really comment too much on this as I have not had the time to do the exercises because of a heavy workload and I just forget. So at the end of the day the book did not hold my interest enough to apply anything. So I don't know if it works or not. A good book to me says " Don't put me down and you can't ". Well I didn't even finish this book as it was not interesting enough.

I choose 1 star as this book is very poorly written or no editing was done. Bad grammar, poor spelling, incomplete sentences. Then you are told to get the rest of the information at the publishers website, however you don't get the name of the publisher. I will not recommend this to anyone.

For me it didn't work but I will try again.
