Katrina Raphaell is the best selling author of the Crystal Trilogy: Crystal Enlightenment (1985), Crystal Healing (1987) and The Crystalline Transmission (1989). Known as a pioneer in her field, Katrina founded The Crystal Academy of Advanced Healing Arts in 1986 and has since taught thousands of students around the world the art, theory and practice of Crystal Healing. She has also trained teachers to carry on her work in Crystal Academy satellites world wide. Her new book, Crystalline Illumination, embodies the last thirteen years of crystal research and is already published in three languages.

Crystal Enlightenment by Katrina Raphaell, while written in 1985 is still current today. I find Ms. Raphaell's writing to be clear and detailed, not the fluff book that seems to fill the bookstores today. This book covers the basics of working with crystals and is one of a trilogy of books. According to Ms. Raphaell, "This book in no way claims to be the only way or the final word on crystals. It

remains forever open to the revision of truth."Beginning with a short overview of crystals, Crystal Enlightenment, covers a range of how crystals are formed by nature and man to what she determines to be future uses of crystals. This book describes a number of stones and their uses. The only thing missing from this book is color images for reference that would help the beginner trying to study stones and their uses. Charts in the back of the book include astrological pairings for stones, something not often found. This chart covers the astrological sign, planet, color, chakras, stone trinities and purpose. The other charts refer to healing stones for chakras, glands, physical and energy. This book isn't really for the dabbler. It is a broad spectrum of quality information, including tuning into your crystals, basic layout for stones and chakra balancing. Crystal Enlightenment provides the opportunity for study, rather than page-turning entertainment. This book may be nearly thirty years old, but it stands the test of time.

I bought this book over 26 years ago when I first came became interested in crystals and wanted to learn more about them. It's definitely a classic when it comes to learning about the different types of quartz and crystals. Recently, I wanted it to read about a particular type of crystal, but may have lost it in one of our moves, so I ordered another copy.

secret labs, I don't know, but I definitely wanted the information on how to use different crystal formations-double terminated, inclusions, teachers, record keepers, etc. I use crystals for healing, and each different formation can take the healing in a different, specific direction. She's very clear about which does what. I can use them by feel, but I have so many, too many to keep in my head, so it's nice to have a reference guide. I appreciate this book tremendously. I've only had it a few days and have already used it for five meditative healings, each one unique, and each one getting the desired results.

This is the 1st in a series of 4 crystal books by Katrina. They are easy to understand. . The other 2 books are Volume II "Crystal Healing" (1987), Volume III "The Crystalline Transmission" (1990) and "Crystalline Illumination" The Way of the Five Bodies (2010). I suggest this 4 books if you are interested in healing with stones and crystals and healing (yourself or others) IN this book she explain in a easy way what crystal are, how they are formed, ect. She explain how to use them, cleaning and recharging them. Katrina show how to heal with them and layouts to do it. She show us diferent crystals , amethyst, smoky quartz,..ect. and stones that we can use to heal.

I have not read very many books about gemstones so I suppose it depends how much you already know about the subject matter. This book is well written with good explanations as far as use for healing layouts or meditations and such. It only extensively covers 28 of the more common gemstones. The stones here are given thorough coverage in easily understandable language. I found this book easy to read. I would recommend this book along with "Crystal Bible" by Hall, or "Crystal Handbook" by Eason both of which cover many more stones but with less depth.

Love Katrina and loved this book. This was in great shape, and I was happily surprised! Thank you!

A Great resource book for the properties of healing crystals, Easy enough to understand for beginners and Crystal Enthusiasts looking to understand why a certain Crystal may call to them , yet complex enough to keep and use well into advanced studies and uses. One of the first books I ever picked up and used when I was starting my own *journey* to understand the healing uses of Natures own gifts.

I have not finished this book yet but i am in love with it. Covers any question or thought ive had about crystals. Am excited on add these wonderful vibrations into my life. Just my limited use with them has shown how they can make us feel better.
