Customer Reviews

"One of the finest first aid books I've seen." -- Mel Otten, M.D. --This text refers to an out of print or unavailable edition of this title.

A wilderness educator since 1973, Tod Schimelpfenig is the curriculum director for the NOLS Wilderness Medicine Institute. He lives in Lander, Wyoming.

Didn't use it much in the course, and didn't realize the book was supplied by my course, but has good info none the less.

If you want to know the NOLS material before you take the class this is the book to get. Covers everything and does it well.

Great resource, more detail than the spiral NOLS WMI notebook you get in WFR re-certs, but not too text-heavy.

Exceptional source

good reference

Very comprehensive

Lots of information. Unfortunately, being the kindle edition, I can only read it on my laptop. This is something that would be good to have in hardcopy to take with you on hiking or camping trips. Otherwise you have a lot of memorization to do. If you learn all this by heart, you will be halfway to being an EMT.

This book is a very good book for starters and a good review for those who haven't done it in a while. Between being an outdoorsman and former career Military, with many medical experiences, it was mainly a review for me. The treatment sections were small and short and not very detailed. There was more devotion to what could happen rather than how to treat it IMO.
