I had the older edition of the Barron's AP Psych book when I was in high school and it helped me get a 5 on the AP Psych test. It does a good job of breaking down the different sectors of psychology and explaining problems in a way that isn't overly complex. I liked this book so much that I bought the 7th edition of this book for my younger brother to study with to take his AP Psych test. He also got a 5 so I am here to tell you guys that the Barron's study prep books are legit and well-priced too!

Not a fan of Barron's review. I keep hoping they'll get better as they have such a big name, but I'm always proven wrong. Too much emphasis on unnecessary topics and not enough on others.

It dumbs it down enough for me to understand the definition of the terms and the information

This one worked for me!

good product thank you

This book saved my butt. I had AP Psych as a not-so-great online course and learned everything from Barrons. I got a 5 on the exam literally because of this review book.

Great book, Great Price!!

Good
