## Customer Reviews

The Math 24/7 series emphasizes how math skills come into play at all times and in all places, from the kitchen to the soccer field. Each book centers on a young person who is involved in a series of scenarios that requires real-world math to solve a problem. Double-page spreads introduce both the dilemma and the math concept needed to solve it. Guided questions walk readers through the process and provide practice problems. In Culinary Math, a culinary student uses estimating to budget his grocery shopping, multiplication to determine a food's calorie content, and fractions to measure ingredients. A final spread in each volume recaps the concepts with additional practice problems. Related back matter, including an answer key, concludes the books. Eating, football, shopping, and video games? Really, mom, they're for math! Grades 5-8. --Angela Leeper

It has nothing referencing AP, EP, Yields, percentages, Menu costs, etc. Basically, if you need business culinary math this is not the book.

Excellent resource!
