Samantha Soper-Caetano - stirthewonder.com Samantha is a stay-at-home mom to an active preschooler.

She loves thinking of creative ways to engage her son in hands-on learning, including fine motor activities, sensory play, nature exploration, science experiments, and book-inspired ideas! Sarah McClelland - littlebinsforlittlehands.com Sarah is a stay-at-home mom of one busy boy. She enjoys incorporating important fine motor skills practice into a variety of hands-on learning activities that her son enjoys. Sarah's blog focuses on science, sensory, and STEM activities for learning and play.

Lots of cute ideas that we actually used! The balancing scale was our favorite! I guess now that we have Pinterest, a book like this is a moot point, but I liked having it all in one place!

Really, it's a good product.

Such a fantastic book with easy, creative and very fun ideas. My son is a lego maniac and he LOVES this book already!!

Nice ideas. Lots of fun times ahead.

grandkids love it

I am a kindergarten teacher. While so many admins think of blocks and Legos as play and fluff, I have stood strong and provided these materials in my classroom. Our Title One school is most challenged with parent participation in events that will build home-learning. Therefore, any chance I have to provide my kinder-bears with great learning experiences, I am going to do it. Find Learning with Lego was such a treat this summer. I bought the hard copy AND the e-book. I have already seen so many ideas to provide independent exploring and working in small groups, too. This book is going to be a favorite for my students and I know I will have to go searching other classrooms to find out who borrowed it. Wonderful resource. Thank you.

If you are looking for creative ways to use all the LEGO bricks you normally step on walking from your child's room to the kitchen, then this book is for you! This book gives you all the reasons in the world to gather your LEGO bricks and start playing, building and learning with your child by your side. These hands-on projects are beautifully illustrated and there are detailed instructions with every activity. You TOO will have a blast with this book - I promise!

I love this book! The activities are excellent. There are many choices of things to do, and the activities "fit" many different age groups. Each activity is described completely on a single page, so there's no need to flip around halfway through a challenge. Finally, the activities are presented as challenges that can have many possible solutions. It is not a book of step-by-step projects for kids to complete by following directions. The challenges ask them to use problem-solving skills, be creative, and experiment. What a fun way to build those skills!
