Customer Reviews

Frank Longo is a freelance puzzle creator who lives in Hoboken, New Jersey. He has had more than 2,000 puzzles published since 1993 and written many books for Sterling, including Master Ninja Sudoku, Oy Vey! Sudoku, and Exercise Your Mind, as well as crossword books.

The difficulty of the puzzles are as advertised. However, squares too small and the paper quality not helpful when erasing.

I purchased this and another extremely challenging sudoko book for my Dad, as he just turned 78. His mind is sharp as a tack, and he loves continuing to keep his mind working and these books is his 'mental-brain exercising' routine. He loves the hardest of the hard ones, and it is a real challenge when he can't get the answers right away.... That is what he wants and loves doing these. I can't do them, I'm not a number puzzles person, but my Dad is and he loves these....

I have bought a lot of Sudoku advanced books and consider myself an advance player. This book disappointed me. A lot of the puzzles in the book can not be finished without looking at the solving page section. You can find a couple of numbers on the puzzle and then you are stuck. I will not be buying more books from this collection.

Since I way back 8 years ago, in the weekly Danish engineering newspaper, one day received a double-sided writing about Sudoku, with 3 Sudoku puzzles, and there read that research had found the Sudoku to be the best training for the brain, I then started on Sudoku. Each day since then, I have solved at least one Sudoku puzzle, among other for getting some brain relax after all of the other hard brainwork during the day. Later it has been written that there has come another brain puzzle which should be a little bit better than Sudoku, but I like Sudoku. The first Sudoku books which I bought was the "Mensa Absolutely Nasty Sudoku", level 2, 3, and 4, all written by Frank Long. The actual "Beyond Black Belt Sudoku", is a bit more difficult than the Mensa level 4. But in the engineering newspaper the 3 Sudoku puzzles which then was put in were made by participants in and international Sudoku competition, and there are extremely difficult to solve, and I have newer yet in any book found Sudoku puzzles just close to these. But all together this book is a nice book, with fine difficult Sudoku.

This is a very good set of hard, but solvable puzzles. Knowing unique rectangles helps. Extreme techniques are not required. Mr. Longo has sustained his reputation, providing good, hard puzzles suitable for experts or those so aspiring.

The receipient of this gift loved the book. I sought out very difficult puzzles for my brother the "expert" and he had an extended time solving these - that's the point, isn't it? He was home on disability and bored stiff. Not after receipt of this present!

For any fan of very hard Sudoku (you know who you are), this is an excellent book. I have solved enough of the puzzles in it to know that they are fair, but very hard. They do not often have a choke point that can be passed only with a single complicated "fish" solution that is normally impossible to find if you do Sudoku by hand rather than with a computer. But, as the authors make clear, do NOT think of trying this book if you have only solved ordinary Sudoku. If you are ready for more difficult puzzles, you might start with earlier books in the same series.

I actually ordered this guy on accident, thinking I was getting "Beyond Black Belt Kakuro." But I'm not sad about it! I'm very happy to have accidentally gotten back into Sudoku after my hiatus with Kakuro. Does a great job of working my brain!
