PREDNISONE Medication: Treats Lupus And Other Conditions Such As Arthritis, Multiple Sclerosis, Severe Allergic Reactions, Etc

Synopsis

“Although, your health condition may impact your everyday life, do not let it define who you are.”

• Prednisone provides relief for inflamed areas of the body. It is used to treat a number of different conditions, such as inflammation (swelling), severe allergies, adrenal problems, arthritis, asthma, blood or bone marrow problems, endocrine problems, eye or vision problems, stomach or bowel problems, lupus, skin conditions, kidney problems, ulcerative colitis, and flare-ups of multiple sclerosis. Prednisone is a corticosteroid (cortisone-like medicine or steroid). It works on the immune system to help relieve swelling, redness, itching, and allergic reactions. This medicine is available only with your doctor’s prescription. Thanks and may you have a good understanding about this drug

• Prednisone. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!
