Tandy Leather Making Leather Knife Sheaths Vol. 2 61966-02

Synopsis

From basic leather working techniques to the professional-level tips you need to make your project its best, this how-to book will walk you through the steps to produce two top-quality welted sheath designs: a welted sheath with attached belt loop, and one with belt clip and protective strap. Each part of the process, from making the first sketch to completing the final leather treatment, is explained in detail, with extensive step-by-step photographs and templates. A general introduction to sheath making, basic information about tools, and a glossary of technical terms are also included. This book gives you the know-how to make these two sheaths, and also serves as a manual for developing others of your own design.

Book Information

Series: Making Leather Knife Sheaths (Book 2)

Spiral-bound: 144 pages

Publisher: Schiffer; 1 edition (December 9, 2015)

Language: English

Customer Reviews

David Heflinger is a master in orthopedic engineering and has years of experience working with leather.

It seems the author likes pretty much one style of scabbard. This book is very basic much like volume 1. This Volume does have more build photos, however it offers very little more over Volume 1. With a little imagination you could build a better scabbard. It does have some data for leather care, dying, and shaping. This however does not give enough points to over rule the basic pattern of scabbard, with very little difference.

Good book, however this is part of a 3 volume set. If you are new to leather working and sheath

making in particular you should get all three volumes

Excellent book with clear instructions.

Filled with good ideas and details.

Great book for a beginner

great book

Part of a gift
