Olds' Maternal-Newborn Nursing & Women's Health Across The Lifespan (9th Edition)

Synopsis

This family-focused text that provides comprehensive coverage of maternal-newborn nursing and women's health with special attention to evidence-based practice, cultural competence, critical thinking, professionalism, patient education, and home/community care. Accurate, readable, personal, and engaging, **Olds's: Maternal-Newborn Nursing & Women's Health Across the Lifespan**, 9/e reflects a deep understanding of pregnancy and birth as normal life processes, and of family members as partners in care. This edition includes a deeper discussion of childbirth at risk; four new nursing care plans; updated coverage of contraception, complementary/alternative therapies, and much more. New teaching features include Professionalism in Practice and Health Promotion Education boxes, Clinical Judgment case studies, and Critical Thinking questions. This edition also aligns more closely with AACN's Essentials of Baccalaureate Education for Professional Nursing Practice.

Customer Reviews

Michele R. Davidson, PhD, CNM, CFN, RN, is Associate Professor of Nursing and affiliate faculty member, Women's Studies Program, George Mason University. Her 21 years of experience include labor and delivery, postpartum, NICU, reproductive endocrinology, and inpatient gynecology at Columbia Hospital for Women. She has delivered over 1,000 babies during her career as a nurse midwife and formulated a postpartum depression support group, which provides ongoing treatment to indigent women. Her doctoral dissertation, "Care of High-Risk Women Cared for by Certified

Nurse Midwives", brought attention to the potential care that midwives could provide to a high-risk obstetrical population. Dr. Davidson has published over 50 papers, authored more than 17 textbook chapters, and published an additional 15 textbooks that she has co-written, including the international bestseller "Old's Maternal-Newborn Nursing and Women's Health Care Across the Lifespan" (9th ed.), translated into nine languages. She was Past Vice President of the Washington, D.C. chapter of the American College of Nurse Midwives and was an item writer for the ACNM National Certification Examination. She received an honorary award from the March of Dimes for her ongoing care to pregnant women.

Marcia L. London Marcia L. London has been able to combine her two greatest passions by being both a nurse caring for children and families and a teacher for almost 35 years. She received her B.S.N. and school nurse certificate from Plattsburgh State University in Plattsburgh, New York. After graduation, she began her nursing career as a pediatric nurse at St. Luke's Hospital in New York City then moved to Pittsburgh, where she began her teaching career. Mrs. London accepted a faculty position at Pittsburgh's Children's Hospital Affiliate Program and received her M.S.N. in pediatrics as a clinical nurse specialist from the University of Pittsburgh. Mrs. London began teaching at Beth-El School of Nursing and Health Science in 1974 after opening the first intensive care nursery at Memorial Hospital of Colorado Springs. She has served in many administrative and faculty positions at Beth-El, including coordinator for nursing care of children for 32 years. Mrs. London maintains her clinical skills working in an urgent care and after-hours clinic and doing undergraduate pediatric clinical supervision. She obtained her postmaster's neonatal nurse practitioner certificate in 1983 and subsequently developed the neonatal nurse practitioner (NNP) program and the master's NNP program at Beth-El. She is active nationally in neonatal nursing and was involved in the development of the Neonatal Nurse Practitioner Educational Program Guidelines. She has contributed 5 chapters to various neonatal nursing texts. Mrs. London is active in nurse practitioner education in general. She was involved in the revision of the Core Competency for Nurse Practitioners and Curriculum Guidelines for Nurse Practitioner Education, as a member of the Education Committee of the National Organization of Nurse Practitioner Faculties and participated as part of the Core Competency Validation Expert Panel. Mrs. London has also pursued her interest in college student learning by taking doctoral classes in higher education administration and adult learning at the University of Denver in Colorado. She feels fortunate to be involved in the education of her future colleagues. Her teaching philosophy is that, with support, students can achieve more than they may initially believe they are capable of achieving. Mrs. London and her husband have two sons and one dog (Reilly, daughter by proxy). Her two sons, Craig and Matthew,

are involved in computer informatics, and media arts and animation and are more than willing to give Mom helpful hints. Patricia A. Wieland Ladewig Patricia A. Wieland Ladewig received her B.S. from the College of Saint Teresa in Winona, Minnesota. After graduation, she worked as a pediatric nurse before joining the U.S. Air Force. After completing her tour of duty, Dr. Ladewig relocated at Florida, where she accepted a faculty position at Florida State University. There she embraced teaching as her calling. Over the years, she taught at several schools of nursing while earning her M.S.N. in maternal-newborn nursing from Catholic University of America in Washington, D.C., and her Ph.D. in higher education administration from the University of Denver in Colorado. In addition, she became a women's health nurse practitioner and maintained a part-time clinical practice. In 1988 Dr. Ladewig became the first director of the nursing program at Regis College in Denver and., in 1991, when the college became Regis University, she became dean of the Rueckert-Hartman School for Health Professions. Under her guidance, the Department of Nursing has added a graduate program and the School has added three departments: the Department of Physical Therapy, the Department of Health Services Administration and Management, and the Department of Health Care Ethics. Dr. Ladewig feels that teaching others to be excellent, caring nurses gives her the best of all worlds because it keeps her in touch with the profession she loves and enables her to help shape the future of the nursing profession. When not at work or writing textbooks, Pat and her husband, Tim, enjoy skiing, baseball games, and traveling. However their greatest pleasure comes from their family: son Ryan, his wife, Amanda, and grandson Reed; and son, Erik, his wife Kedri, and granddaughter Emma.

What else do you need to know. I had bought the handbook & it is great, no doubt about it. But from my poor results on practice tests, I could tell I need "the rest of the story" and I found it in the full text. I know, it is pricey, and you are worried about throwing good money after bad, but if you want to pass the RNC-MNN, you will read this book (at least the appropriate chapters), and utilize their online materials that are available to you! And, gosh, its is just a beautiful textbook that belongs on any serious RNC-MNN book shelf! Oh, and good luck! :)

This is good book. Easy to follow. It was interesting to read if you are into L&D.

I had read another comment on how this book is not helpful on a kindle which made me nervous about purchasing it since it's for school and therefore important for me to be able to use well. I went ahead and bought it anyway due to time restrictions, and I have found that it must depend on which

version/generation of kindle you have. I recently got a kindle fire HDX 7", and on this version of kindle, this textbook does have a table of contents and a search function. It's much more user friendly than I expected, thank goodness.

I received the book in a timely matter and everything, but I'm sorry to say that the book I received was not like the description. The entire binding was torn from the spine of the book. I believe the description stated that it was in "good" condition, but I would say it is "acceptable" at best. How can you use a 1000+ page book if the binding is coming off? If I hadn't needed this book as soon as I received it, I would have definitely sent it back.

Excellent product!

This book was required for one of my nursing classes. So far, it seems to be pretty comprehensive and easy to read. Some of the material is repeated, but repetition also helps with retention; therefore, this may be a positive or negative depending on your personal preferences.

Got the book in good time, condition was great. I never got access to the online nursing.pearsonhighered.com media, however, which would have enhanced my learning experience through this book, as there were several references to the online source for answers to the text questions. I think this is more of a problem with the pearson website; I'm just not sure about the access codes, etc.

There's a lot of information in this book at moms and babies. It was very helpful and explains things in simpler terms. I used this through nursing school. Along with lectures it helped me learn mom and baby concepts and how to care for them.
