Grade Level: Preschool and up

Customer Reviews

Roger Priddy's passion for educating children through fun, informative and engaging books has led him to create some of publishing's most enduring and successful non-fiction early learning books. Roger lives in London and has three children, who have been the inspiration behind many of his best publishing ideas.

We all have those books that, when we see our child bringing it to us, we cringe, because it's not a fun book to read. Well, this is not one of those books! With its vibrant colors and over-sized design, this book never gets old. Each page has something different on it and my 2 yr old granddaughter loves pointing to each item on the page and naming it. There are tons of things to look at along with ABC's and counting activities. I love it because it's fun for me to "read" to her. While I think a child younger than two would definitely enjoy looking at all the pictures, it's especially relevant to a two

year old because a lot of the things depicted in the book are things she's doing, eating or learning. I can see this being our "go to" book for a long, long time. I absolutely depend on reviews before I spending my hard earned money. I hope this review helps!

Oh my goodness! This book is GREAT! First of all, I really wasn't expecting this book to be so big and vibrant. I admittedly did not check out the book's dimensions, so I assumed it would be a smaller book like most others. However, this book is very big (like around 12x12), and really grabs baby's/toddler's attention! The pictures are wonderful as well. They are colorful, vibrant, and there are SO many to look at! My 14 month old learned several new words in a matter of a week just from this book alone! We started by just pointing and saying the words with my son, and have now advanced to "can you point to the...," and he will point to the picture of the word as well as repeat the word. My son comes running up with this book several times a day wanting us to read it. I can see this book being a valuable tool for a while as well, because not only is it a good book for learning first words, but it also teaches so many other things as well. ABCs, numbers, shapes, colors, etc.. Just to name a few. The book is also very well made and durable! This is a MUST if your toddler is anything like mine! Most books do not withstand his roughness, but this one sure does. Bottom line: this book is AMAZING, and I do not believe that it will disappoint. It has been, and will continue to be, a valuable learning tool for my toddler.

My 2 year old loves this book! I homeschool my children so I am always looking for ways to get my little ones to love learning and this is a perfect introduction for them into the basics of preschool. Roger Priddy is a wonderful artist and all of his books are beautiful and engaging. Can't wait to collect them all someday! Thanks . :)

I love that this book is huge and opens to lay totally flat! No creases! My 9 month old is in love with this book and pulls it out every morning to read. What I love about it is that it has a whole page for the alphabet! Everything about this was very well done.

This is one of my 18 month old's favorite books. He has many books to choose from but he always chooses between this book and "Brown Bear, Brown Bear What Do You See?". It's a large book but not too hard to pick up and read for his small hands. There are so many bright pictures and colors. This will be a hit, don't hesitate to buy it!

This is the only book I bought while I was pregnant, and I'm so glad I did! (All other books were received as gifts). A small price to pay for such a high-quality, large, hard-cover book. It has age-appropriate content for babies all the way up to learning to read. My now one-year-old son loves it-- he points at different pictures (most are photographs) and we get to engage in picking up vocabulary. As he gets older, I'll be utilizing it to continue going over the alphabet, shapes, numbers, phonics, matching, colors.. the list can go on. (I'm a preschool teacher and would use this in my classroom!). He's sat on it, chewed on it, flipped its pages hard and it's still in tact and looking bright lol!

My 9-month-old grandson loved this book the second he saw it. I'd have to say it's his favorite book right now. This is a really big board book, and he seemed to like that he had the 'power' to open and close the big pages. He babbled a lot while sitting on my lap playing with this book and looking at the pictures. This book gives you a lot to talk about with a child while reading it together--animals, numbers, colors, common first words, and it has a lot of bright, detailed pictures a child would enjoy sitting and examining on their own. I can picture a child spending a lot of time with this book, and the big, clear, double-page spreads for counting, colors, shapes, etc., make it easy for a child to absorb these concepts. I think this book would make an ideal baby shower gift or first birthday or first Christmas gift.

Love this book! It's colorful and durable and it's big! Perfect for a little curious baby or toddler. I've bought this book and several of the other Bright Baby books and I love them all. I bought a bundle of different Bright Baby books for a first birthday gift. Several of the other mommies at the party mentioned how nice it was. And my friend said her son loves them. It's now my signature 1st birthday gift for all of my friends' babies. I even bought a set for my son. He's only 9 months, but he enjoys looking at all the colors. It's also fun for me to teach him about all of the words and images. 5 stars!
