Customer Reviews

My wife bought a couple of these maps (London and Paris) from the local bookstore just before we took a backpacking trip through Europe. After doing some urban exploration using them, I got addicted. Living in the US, I was pleasantly surprised to see that MapEasy had maps of US cities and regions as well. Every trip I take, I make sure to grab the MapEasy map to get a good grip of the stuff I want to see, and often use them when walking or driving around. I own several, but this is my favorite one!
Pros: Inexpensive
High quality tear-proof
Cool hand-drawn map
Shows the stuff I want to see
Cons: That there aren't more of these floating around
Other US maps in the series can be a little lacking (really just Denver)

Best map so far. Easy to see stores and landmarks. I like GPS but nothing beats a big full map when walkin around.

Nice! Used it during our whole week in Santa Fe!

MapEasy's Guidemap to Santa Fe was published in 1997, which means it was worked up in '96. The streets may not have moved [with some notable exceptions], but a number of establishments located on the maps have closed, been re-named or changed. Were it up to date, I'd give it 4 stars. I enjoy MapEasy products as they help one locate sites in neighborhoods, not just addresses. It's fun to use these to plan out a daily excursion on foot, or help in choosing restaurants and hotels in specific areas because they include drawings and names of establishments at their exact mapped location. The Santa Fe map was great fun to carry around while looking for museums and attractions, and choice places to shop, eat and have a drink were clearly placed when I used it some 8 years ago, but on a recent trip, I had to put it aside as it caused confusion and disappointment based on its obsolescence. I cannot recommend using this dated map until it's been revised and updated, which I hope will happen. A guide book from the series Access, Santa Fe, operates much the same, but with more information on destinations and attractions, similarly located on neighborhood maps. It too is outdated, being published in 1999, but a new edition is coming out November 30, 2006, according to its listing here at . I recommend waiting for it.
